SRT326i

Do you have the need for extra security in indoor environments? SRT326 is a personal alarm with support for indoor positioning and communication.

Indoor positioning

SRT326i is a handheld alarm device with indoor positioning capabilities. Its basic alarm handling and GSM communication functionality is based upon its predecessor SRT326. The indoor positioning is achieved through duplex communication with RF tags. Each tag is programmed with position information that is sent to the SRT326i when it enters the area covered by the tag.

Alarm relaying through RF routers

Once in a while you will find yourself in areas without GSM coverage. Typically it will be a basement or a space with thick walls. Such areas can be equipped with combined RF tags and routers (SRT334i2). In case of an alarm the SRT326i uses an RF tag for positioning, just as usual. But because of the lack of GSM coverage it will have to relay the alarm message through a chain of RF routers to a relay station with GSM coverage, where the message can be forwarded to a GSM network. Other handheld alarm devices in the local area will be alerted as well, enabling quicker response times. A message delivery confirmation is also relayed back to the SRT326i that generated the alarm.

Alarm generation

Besides the user initiating an alarm manually, SRT326i is also equipped with smart alarm features to automatically initiate alarms.

Man Down

If SRT326i detects a lying position, an alarm is sent automatically after a predetermined time period.

Timer alarm

The unit can be set to automatically send an alarm after a certain time period should the user be unconscious or rendered unable to send an alarm herself.

- Developed in Sweden
- Speaker and microphone
- Accelerometer
- Quadband GSM/GPRS
- Supports GeoFencing
- Water proof (IP54)
- 4 days battery lifetime
- Intelligent power saving mode
- Can send low battery alarm
- Small and handy size: 90x46x21,5 mm
- Weight: 94g
- Status LEDs
- USB charging

Accessories

Wall charger, desktop charger, car charger, USB cable, case, charger case and lanyard.
